

# **Notice from Guangzhou Housing and Urban-Rural Development Bureau on Further Enhancing the Job Requirements for Construction Design Reviewers, Construction Management Personnel and Construction Supervisors in Guangzhou**

To all parties concerned:

In order to further improve and optimize the business environment in Guangzhou, create a business environment in line with international standards, reinforce the responsibilities for construction quality and safety on the part of all participating companies, and enhance management of project quality and safety risks, the relevant matters are hereby notified as follows:

## **1. Further Increasing the Required Educational Qualifications for Reviewers at Construction Design Review Agencies and On-Site Supervising Engineers**

Construction design reviewers and chief project supervising engineers for new construction projects in Guangzhou shall meet the following requirements:

1.1. In addition to meeting national requirements pertaining to registration and minimum years of experience contained in Articles 7 and 8 of the *Administrative Measures for the Review of Construction Drawings for Building and Municipal Infrastructure Engineering Projects* (Zhu Jian Bu Ling No. 13), construction drawing reviewers at review agencies in Guangzhou shall also have a bachelor's degree or higher.

1.2. The chief project supervising engineer for the construction site shall be a qualified Registered Supervising Engineer, with a bachelor's degree or above.

## **2. Increasing Educational Requirements for Quality and Safety Inspection and Management Personnel at Construction Sites**

In addition to meeting requirements on years of experience and professional qualifications specified in the *Regulations on the Quality Supervision for Building and Municipal Infrastructure Engineering Projects* (Zhu Jian Bu Ling No. 5), personnel overseeing and managing construction quality and safety in Guangzhou must also obtain an administrative law enforcement certificate issued by the provincial government. After the issuance of this notice, new quality and safety inspection personnel must also have a bachelor's degree or higher.

The above are hereby announced.
